EXPERIENCE

Smartscripts Pvt. Ltd.

Mar 2024 – Mar 2026

Software Engineer

Pune, India

- Led frontend architecture for production platforms including Smart Booking System and an in-house CRM, **reducing platform load time by 40% and bundle size by 30%**.
- Designed and implemented **Node.js REST APIs** for in-house CRM with scalable backend architecture, **improving system throughput by 50%**.
- Implemented performance optimizations using **TanStack Query** and **Zustand** for state management across multiple enterprise applications.
- Applied SEO best practices and web performance optimization techniques, **improving organic search visibility by 25%** across multiple platforms.
- Mentored junior developers and interns in **React Native**, **Node.js**, and **Next.js** development, facilitating faster onboarding.

PROJECTS

OIDC: Identity Provider (IdP) and Next.js SDK | 🔄 | 🌐

Node.js, TypeScript, Express, Prisma, PostgreSQL

- Built a from-scratch **OpenID Connect** Identity Provider to master the low-level mechanics of **OAuth 2.0**, token signing, and identity federation.
- Implemented the **OIDC Authorization Code Flow** and **RS256 JWT** signing with asymmetric RSA key pairs, strictly following official **RFC** and **OpenID** specifications.
- Enforced **PKCE** with **S256** verification and implemented **refresh token rotation** with reuse detection for enhanced security.
- Developed standard discovery document and **JWKS** endpoint for autonomous token verification by **OIDC** clients.

Tabi: Collaborative Trip Planner | 🔄 | 🌐

Next.js, TypeScript, MongoDB, Express, Bun, Clerk

- Centralized workspace for itineraries, budgets, and member management to solve fragmented group travel coordination.
- Implemented granular **Role-Based Access Control (RBAC)** system validated on the server for data integrity.
- Leveraged **Bun** and **Express** for high-concurrency **API** performance and **Clerk** for secure **JWT** authentication.
- Developed an event-driven notification hub using **Node.js EventEmitters** for instant updates on shared expenses.

Shikai: GitHub Companion App | 🔄

React Native, Expo, GitHub API, TypeScript

- Mobile-first dashboard for monitoring contributions, repositories, and activity with a refined aesthetic.
- Integrated **GitHub REST/GraphQL APIs** with client-side filtering and a full file tree explorer.
- Implemented **GitHub OAuth** authentication via Cloudflare Worker proxy with expo-secure-store for encrypted token storage and native security hardening.
- Prioritized information density and native-feel animations for a distraction-free mobile experience.

TECHNICAL SKILLS

Backend & Frameworks: Node.js, Express.js

Databases & ORM: PostgreSQL, Prisma, MongoDB, Mongoose, SQLite

Frontend: React.js, Next.js, Expo/React Native, TypeScript, Tailwind CSS

DevOps & Tools: Git/GitHub, Vercel, Netlify, Render, Bruno

EDUCATION

Bachelor of Engineering in Electronics & Telecommunication

July 2024

Graduated
